EXPERIENCE

June 2025 — present

Project and IT Operations Assistant | AISU Global, China

- Supported the launch and ongoing maintenance of the company's corporate website.
- Collected and documented requirements, tracked changes, and verified completed updates.
- Coordinated technical tasks between the project manager, designers, and other contributors.
- Created standardized templates for project tracking, documentation, and reporting.
- Verified information from multiple sources and resolved inconsistencies.
- Used AI tools to automate research, documentation, and repetitive operational tasks.
- Prepared clear instructions and project materials for internal use.

PROJECTS

- Developed an applicant ranking tracking system using Java, Spring Boot, and React.
- Designed the application structure, worked with structured data, and tested system functionality.
- Developed web applications for a personal diary and a dental clinic information system.
